EFCE calls for nominations in Chemical Reaction Engineering

For the third time, the European Federation of Chemical Engineering (EFCE) is pleased to announce the call for nominations for its **Excellence Award in Chemical Reaction Engineering**.

Launched in 2009, this award has been instituted to recognise an outstanding PhD thesis in the field of chemical reaction engineering.

The award winner will receive a certificate, a cash prize of EUR 1,500, a travel grant of up to EUR 500 and fee waiver to attend the conference where the award ceremony will take place.

The 2015 award will be presented at a special session of the European Symposium on Chemical Reaction Engineering - ESCRE 2015, which will be held in Fürstenfeldbruck, Germany, from 27 to 30 October 2015.

The successful candidate will be invited to give a presentation following the award ceremony.

Nominations may be submitted by any PhD supervisor at a university or PhD-awarding institution in an EFCE Member Country. The PhD thesis nominated must address a topic relevant to the field of chemical reaction engineering. PhD theses defended and published between 1 January 2012 and 31 December 2014 may be proposed for evaluation.

Further information about the nomination procedure, eligibility, and supporting documentation can be obtained from the EFCE website:

<http://www.efce.info/ExcellenceAwardCRE>.

Deadline for nominations: **31 March 2015**.

Ends

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
